

# LAC CANINUM

Bitch's milk  
Mammals

---

## Contact hypersensitivity of the breasts

symptoms shift from one side to the other

---

**Painful swelling of the breasts before menses**, aggravated by touch and jolts, improved during menses. Milk secretion is too profuse after delivery.

**All types of pain or inflammation shifting from one side to the other.**  
Migraines.  
Tonsillitis and sore throat.  
Ovarialgia.  
Rheumatism.

### Aggravation:

- from touch, jolts;
- before menses.

### Improvement:

- with cold applications (rheumatism).
