

# MURIATICUM ACIDUM

Hydrochloric acid  
HCl

---

**Polymorphous light eruptions in summer**

**Acute hemorrhoidal thrombosis**

**Oral aphthosis, stomatitis and ulcerative pharyngitis**

---

**Cutaneous symptoms:** Very pruritic papulovesicular rash.

**Proctology:** Blue tumescent hemorrhoids which are hypersensitive to touch.

**Stomatology:** A high degree of irritation of the digestive mucosa (mouth and anus) with an ulcerous and hemorrhagic tendency.

**Aggravation:**

- by contact (aphthae)
- from sun exposure (polymorphous light eruption)
