Cerebral congestion

Sudden congestive headache with intense and visible throbbing of the carotid artery, relieved by pressing the head between the hands and by cold applications.

After a sunstroke or in hypertensive patients.

Tachycardia, tachyarrhythmia.
Congestive hypertension.

Hot flushes of the menopause.

Aggravation:

- from radiating heat,
- from jolts,
- from noise.

Improvement:

- in the open air,
- when pressing the head between the hands.
